

# Introduction to Visual C#

Classroom or online training course 2 day course outline

This course covers the following topics (any items marked with a \* will be covered if time allows):

### **Creating forms**

- Drawing controls
- Formatting forms

#### **Coding form events**

- Forms and their events
- The two event arguments

#### Laying out your code

- · Commenting out code
- Using regions

#### C# variables

- · Creating and using variables
- The types of variable

#### Enumerations and constants (\*)

- Enumerations
- Constants

## Conditions

- Using IF and ELSE
- The SWITCH statement

## Modular code

- Passing arguments
- Writing functions

#### Arrays

- Using arrays
- · Splitting text

### Looping

- Looping n times
- WHILE loops
- · Looping over collections

### Files and folders

- Stream readers and writers
- The USING statement
- FileInfo and DirectoryInfo

# Debugging and trapping errors

- The TRY clause
- Stepping through code
- Setting breakpoints

## **Using lists**

- Populating lists
- Finding items

## Properties in C#

- RO, WO and RW properties
- Coding properties

Maximum 6 people per course. Scheduled classroom courses include lunch at a local restaurant; you can see how our online training works here. For more information, see https://www.wiseowl.co.uk/.
