

This course combines topics from the following courses (any items marked with a \* will be covered if time allows).

Topics taken from our **REPORTING SERVICES** course

### Introduction to SSRS

- Visual Studio and SSDT
- Solutions and projects
- The Visual Studio environment

### Designing a Simple Report

- Authoring a report
- Using report items
- Selecting and formatting report items
- Number formats

### Data sources and datasets

- Shared data sources
- Shared versus embedded datasets
- Using Query Designer

### Tables

- Structure of a table
- Formatting tables
- Inserting rows
- Interactive sorting
- Repeating page headers

### Grouping tables

- Using the grouping panes
- Row and column groups
- Displaying subtotals
- Outlining

### Expressions

- Calculated fields
- The ReportItems collection
- Using built-in fields
- Conditional formatting - expressions

### Pages and printing

- Page headers and footers
- Pagination between groups
- Header and footer expressions

### Parameters

- Using query parameters
- Creating drop lists
- Multi-value drop lists
- Formatting using parameters

### Indicators

- Creating indicators
- Changing the symbols displayed
- Stopping indicators stretching

### Gauges

- Creating and formatting gauges
- Gauge panels
- Pointers, scales and ranges

### Matrices

- Areas of a matrix
- Sorting and grouping matrices
- Creating and formatting subtotals

### Charts

- The areas of a chart
- Creating charts
- Formatting charts

### Data bars and sparklines

- Need for a grouped row
- Creating data bars
- Creating sparklines

### Lists (\*)

- Creating and formatting lists
- Grouping using lists
- Using rectangles in lists

### Subreports (\*)

- Creating a child report
- Creating the main report
- Creating and formatting subreports

### Drill-through reports

- Parent and child reports
- Creating actions
- Passing values to a child report

### Maps (\*)

- ESRI shapefiles / SQL spatial data
- Linking to datasets
- Map layers
- Center points and point layers

### Deploying reports

- Setting the target server
- Deploying an entire project
- Deploying single reports

### The SSRS web portal

- Browsing to the web portal
- Viewing reports
- Managing reports

### KPIs and mobile reports (\*)

- Creating a KPI
- Installing Mobile Report Publisher
- Creating a mobile report

### Subscriptions (\*)

- How subscriptions work
- Creating a new subscription
- Managing subscriptions

Topics taken from our **ADVANCED SSRS** course

### Advanced expressions

- Understanding scope
- Using RowNumber
- Running totals

### Variables

- How variables work
- Report variables
- Group variables

### Embedding code

- Setting code for a report
- Calling functions in expressions
- Better ways to write code

### Using SQL views

- Why views are a good idea
- Designing views
- Scripting views
- Creating virtual tables

### Stored procedures in SSRS

- Pros and cons of stored procedures
- Server Explorer vs SSMS
- Creating and editing procedures
- Using for reports

### Stored procedure parameters

- Creating report parameters
- Refreshing fields
- Default and null values

### Dropdowns with procedures

- The stored procedures needed
- Cascading dropdowns
- Replacing SELECT A VALUE

### Multivalue parameter procedures (\*)

- Splitting the choices made in SQL
- Displaying the chosen data
- Restricting the number of choices

### Improving report navigation

- Document maps
- Using bookmarks
- Setting tooltips

### Dynamic reports

- Dynamic datasets
- Dynamic grouping
- Dynamic matrices

Maximum 6 people per course. Scheduled classroom courses include lunch at a local restaurant; you can see how our online training works [here](https://www.wiseowl.co.uk/). For more information, see <https://www.wiseowl.co.uk/>.
